

Block Coding

With technology now a regular part of daily life, and a major part of a wide range of careers, teaching kids how to code is becoming increasingly important. Block Coding allows kids to learn the fundamentals of coding in a simpler format. It's also powerful enough to build applications and games. Block-based programming languages can also be used by adults who are beginners to coding.

CODING FOR KIDS @ VELLTTECH

Your Best IT
Training &
Solution

Coding hour

WE HELP YOUR KIDS TO DEVELOPE BE CREATIVE & INNOVATIVE

CODING FOR KIDS

Scratch

Scratch is the world's largest coding community for children and a coding language with a simple visual interface which makes it a good place to begin as a programmer. Learn the concept of programming blocks such as loops, variables, motions and move on to simple games and animations.

Code it!

Code it!

We learn by creating amazing games such as The Big Duck Race 1 to 3, coding images and animations, creating Terminal applications, stunning chart applications and more.

App Inventor

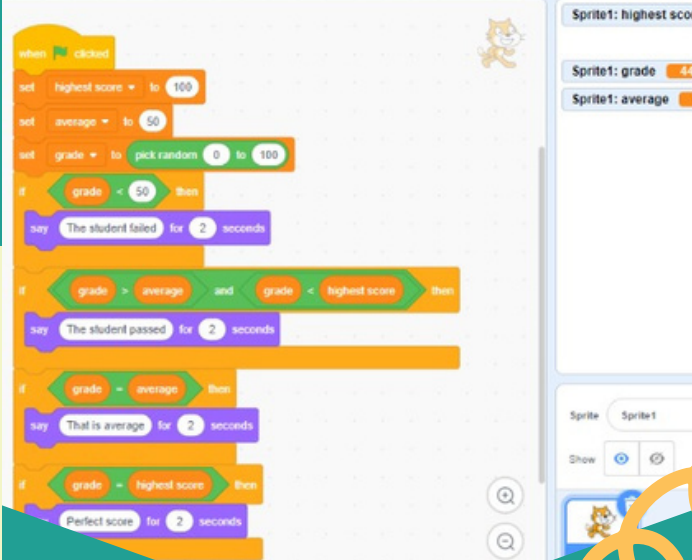

MIT App Inventor is an intuitive, visual programming environment that allows everyone – even children – to build fully functional apps for Android phones, iPhones, and Android/iOS tablets.

Minecraft & Hack STEM

Microsoft

From computer science and math to mixed reality, Students will learn Minecraft and Build affordable activities to help students visualize data with Hack STEM
